1/ National Agricultural Statistics Service (NASS) began reporting "limited" and "undersized" as separate categories in 1990 and made estimates for 1988 and 1989. All data since 1988 are as reported by NASS. 2/ Mostly canned, except for 1980 when use of limited-size fruit in canned ripe olives was not permitted. Reported by California Olive Committee until 1987. 3/ "Limited and undersized" reported by NASS, minus "limited size" reported by California Olive Committee for 1976 to 1987. Includes undersized and culls.

na = not available. 1/ Cranberries paid for by processors and lost because of dehydration and berry breakdown after delivery. 2/ 1980-86 prices represent equivalent returns at first delivery point, screened basis of utilized production. Beginning 1987, prices are a weighted average of co-op and independent sales. Co-op prices represent pool proceeds less returns for processing non-cranberry products, capital stock dividends, capital stock retains, and other retains. 3/ 1 barrel = 100 pounds.
