

Appendix: Definition of Geographic Regions

The list below indicates the countries included in the geographic regions used in the tables and text in this report. Inclusion of supply, use, and trade data for a particular country and commodity is dependent on availability of those data in the USDA database. USDA supply and use data are not available for all commodities, or for all countries listed below.

Within the tables included in the report, data are frequently aggregated into regions defined, for example, as “Other Asia” or “Other North Africa and Middle East.” These aggregates include data for all countries in that region (subject to data availability), except those broken out separately in that table. For example, “Other Asia” will include all countries listed below for the Asia region, less any Asia region countries shown individually in the table. Aggregates listed simply as “Other” include available data for all countries in the world not already accounted for by the individual countries and regions shown in the table.

Europe

European Union-15 (EU-15): Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, United Kingdom
