-- = Not available. 1/ 2012 prices are preliminary. One hundredweight (cwt) is equal to 100 pounds. Prices in this table can be read as either cents per pound or dollars per cwt. Commercial vegetable prices are measured at the point of first sale. Prior to 2006, they were f.o.b. (free on board) shipping point prices
Source: USDA, National Agricultural Statistics Service, *Agricultural Prices*.

* Beginning in 2012, data coverage and market analysis for melons is included in the *Fruit and Tree Nuts Outlook*.

* **Beginning in 2012**, monthly updates to this table are available in the *Vegetable and Melons Data*, providing more timely access to data. The *Vegetable and Melons Data* product now contains producer and retail price indexes, selected retail prices, and detailed U.S. export and import data. Eventually the data product will encompass (and extend) the time series data currently contained in the *Vegetables and Melons Yearbook* and in individual commodity data sets.

1/ Not seasonally adjusted. 2/ Includes potatoes.

Source: U.S. Department of Labor, Bureau of Labor Statistics, <http://www.bls.gov/data/home.htm>.

* Beginning in 2012, monthly updates to this table are available in the *Vegetable and Melons Data*, providing more timely access to data. The *Vegetable and Melons Data* product now contains producer and retail price indexes, selected retail prices, and detailed U.S. export and import data. Eventually the data product will encompass (and extend) the time series data currently contained in the *Vegetables and Melons Yearbook* and in individual commodity data sets.

Fresh table 7—Fresh-market vegetables: U.S. average retail prices, by month, 2002-11*

* **Beginning in 2012**, monthly updates to this table are available in the *Vegetable and Melons Data*, providing more timely access to data. The *Vegetable and Melons Data* product now contains producer and retail price indexes, selected retail prices, and detailed U.S. export and import data. Eventually the data product will encompass (and extend) the time series data currently contained in the *Vegetables and Melons Yearbook* and in individual commodity data sets.

1/ Crop value from 2004 forward is based on grower prices while prior to that, it is on an f.o.b. shipping-point basis. 2/ Reported data includes some processing uses in addition to fresh-market information. 3/ Value excludes production not marketed because of shrinkage. 4/ When comparing to past years, note that data for 2000 and 2001 may not be directly comparable to previous years and 2002-07 due to changes in the vegetable program in 2000 and 2002.
