Subject of Review: This report examines trends in China's dairy sector and assess the potential for China's rapid growth in dairy consumption to benefit US exports. The research finds that much of China's growing demand for dairy products is being served by expanding domestic production and imports from countries with which it already has strong ties, but this growth in production is creating opportunities for expanded US exports of livestock feed.

Purpose of Review: The purpose of the review is to ensure the high-quality of the economic analysis, transparent explanation of methods, objective interpretation of results, and effective communication to the intended audience.
