

Second Food Security Measurement and Research Conference, Volume I: Proceedings. Edited by Margaret S. Andrews and Mark A. Prell. Food and Rural Economics Division, Economic Research Service, U.S. Department of Agriculture. Food Assistance and Nutrition Research Report No. 11-1.

Abstract

The Second Food Security Measurement and Research Conference (February 23-24, 1999) was co-sponsored by the U.S. Department of Agriculture's Food and Nutrition Service and Economic Research Service and the U.S. Department of Health and Human Services' National Center for Health Statistics. The conference was the second in a series and was attended by researchers from government, academia, and the private sector. The conference was part of an ongoing program of Federal food security research, the goal of which has been to establish a stable measurement strategy to assess annually the food security status of the U.S. population. This report is volume I of a two-volume set and contains abbreviated proceedings of all presentations and remarks by discussants at all sessions from the conference. The companion publication, *Second Food Security Measurement and Research Conference, Volume II: Papers* (February 2001, Stock # ERS-FANRR-11-2) contains a set of research papers that conference participants prepared to provide further detail on the content and findings of some research presented at the conference.

Keywords: Food security, hunger, food assistance, nutrition monitoring.
